JackFlash is an independent math app, designed and built by one dad — and test-driven by his kid.

We believe kids deserve math practice that teaches the way the best classrooms do — not a drill machine with a subscription attached.

When math was overhauled, there was no “mastery” and things felt like a year for it. JackFlash is how the real Singapore Math progression, with 1000+ items, and 1000s more about your child.

Mastered means fast and unaided — not three lucky taps.

Step 1: Touch the Math

Concrete

Kids build the problem with their hands — counters, groups, pieces they can see and move.

Step 2: See the Model

Pictorial

Bar models and number bonds turn objects into pictures — the bridge Singapore Math is famous for.

Step 3: Learn the Shortcut

Abstract

The number facts and it's just the fact — answered quickly, with no help on screen.

Smart Practice

Five categories decide what comes next.

Rehearsed, recognized, right in the app. No mystery engines. Every fact also in one of five categories, and the category decides how soon it comes back.

Using app

Smart Practice adapts to your child

Every problem picked for what they're ready for next.

10:50

How does JackFlash pick what to practice?

JackFlash uses Smart Practice, so your child never sees random problems. Every question is picked based on what they know, what they're still learning, and what they're ready to review.

Five categories, weighted differently

Rehe — Only 2-3 unseen facts introduced at a time, so nothing gets overwhelming.

Learning — Seen before but not yet mastered. Shown often.

Struggling — Missed repeatedly. Top priority.

Mastered — 3 correct in a row. Moves into long-term review.

Review-due — Mastered facts whose review window has come up.

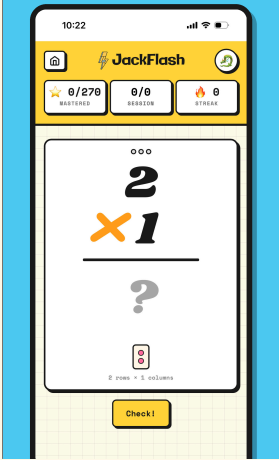

Mastering isn't permanent

A fact becomes mastered after 3 correct answers. If your child misses a mastered fact during review, it drops back into learning — the standard stays honest.

Spaced repetition keeps mastered facts

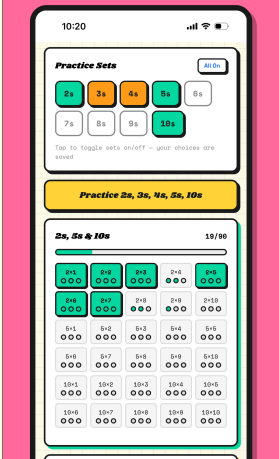

See the math –
don't just guess

Dot arrays and number bonds –
understanding first, fluency second.

Mastery that
actually sticks

Spaced review on a widening schedule –
next day, 3 days, 7, 14, 30.

Available from 2020

Privacy

Private by design, not by policy.

Everything flows on your device – no accounts, no network, no ads.
There's nothing to leak because nothing is collected.

Price

One price. Once.

No subscriptions. No ads. One.
